

SURON

The Company

2024

SURON is a global expert and innovative partner in the development and manufacturing of high precision components for microelectronic applications in the world's most advanced medical, microelectronics, aerospace, military and telecom industries, where reliability and high performance is essential.

SURON
Precision Solutions

A unique combination of expertise and experience, comprehensive in-house advanced technologies, flexible engineering and creative thinking, enable SURON's devoted team to push the boundaries of manufacturing and fulfill customer demands as they evolve.

Expertise

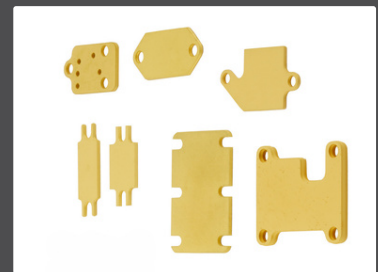

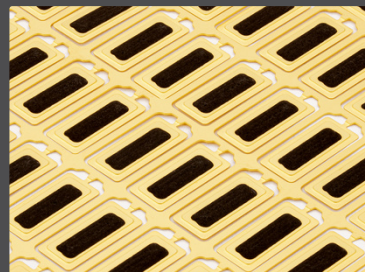

- Mechanical Design
- Metallurgical and Chemical Processes
- DFM (Design for Manufacturing)
- Process Developments
- Design Reviews
- High Quality Standards

Solutions

- **Hermetic Package Components:**
metal packages, lids, lead frames, baseplates, rings
- **Components for RF Devices:**
RF contacts, mesh filters, custom absorbers
- **Components for EMI Shielding:**
covers, shielding solutions
- **Other Precision Components**
shims, holders, needles and more
- **SMT Stencils**
- **Wave Soldering Pallets**

Technologies

- Photo Chemical Etching
- Micro-Laser Cutting
- High Speed Milling
- Electroforming
- Plating: Gold, Nickel, Tin, Palladium
- Laser Welding
- Precision Bending

Suron's major advantage is the unique ability to manufacture with a wide array of metal types on thin sheets, with extreme precision
